Experience

Frontend Developer   Aug 2022 - Feb 2024
SCube.co

- Specialized in **React JS, Next JS, Material-UI, and Tailwind CSS**
- Improved application performance using Redux for state management
- Enhanced **SEO**, resulting in better search engine visibility
- Ensured responsive design and cross-browser compatibility
- Implemented **Formik forms** with **Yup** for effective input validation
- Integrated **Contentful** CMS for dynamic content management
- Developed robust user authentication with Firebase
- Collaborated effectively in **agile** development environments

Key Projects:

Innovate Finance (Next JS, Tailwind CSS)

- **Managed and optimized:** 110+ static pages and 500+ dynamic pages, enhancing performance and SEO.
- **Responsive Designs:** Ensured full responsiveness across all devices with Tailwind CSS.
- **Added functionalities:** Implemented dynamic content fetching, optimized image loading, and integrated third-party APIs.
- **Performance Optimization:** Reduced load times with asset optimization, caching, and lazy loading.
- **SEO Enhancements:** Applied best practices (meta tags, structured data, keyword optimization) for improved rankings.

GBBC Project (Next JS, MUI, Contentful)

- **Contentful CMS Integration:** Enabled easy content updates and scalability.
- **Global State Management:** Used Context API and Redux for consistent data flow.
- **Mobile-Friendly:** Optimized for various screen sizes and devices.
- **Responsive Designs:** Created responsive UI components with MUI.
- **Functional Enhancements:** Implemented data fetching, form validations, and user authentication.
- **Performance Optimization:** Improved rendering performance and minimized bundle sizes.
